

## Medical Breakthrough Relieves Low Back Pain Without Drugs or Surgery!

In the past, a patient suffering from disc problems usually was given pain medications, instructed to refrain from physical activities, referred for physical therapy, and when they weren't progressing they were sent for spinal surgery. Conservative chiropractic care proved very helpful in many cases, yet there have been some cases when surgery seemed to be the only other option... until now. Today, you don't have to live with that pain anymore. Thanks to the concerted efforts of a team of top

physicians and medical engineers, Spinal Decompression was developed to effectively treat lower back pain and sciatica resulting from herniated or deteriorated discs. Spinal Decompression not only significantly reduces back pain in many patients, but also enables the majority of patients to return to more active lifestyles. With the DRX9000, You Can Take Hold of Your Life Again!

**For a Documentary DVD explaining the therapy, please call 847.885.8820 or visit [www.DrPetrone.com](http://www.DrPetrone.com)**  
 \*Offer ends 2/28/10

- Reduce your back pain.
- Reduce your symptoms.
- Reduce your disability.
- Improve your quality of life!

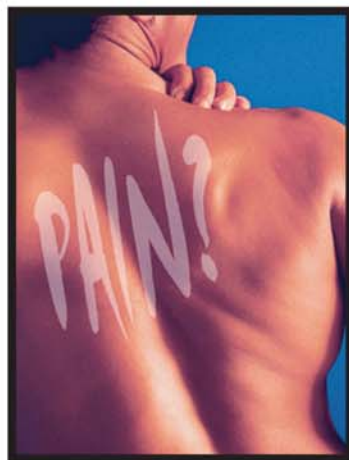

### Space Technology, Simple Solution. The ProAdjuster.

You can achieve maximum health for your body now and in the future beginning with a simple anatomical concept. The nervous system controls every function of your body. If this network is interfered with, pain ensues, as does bodily malfunction, resulting in sickness and diminished overall health. The

"something" you can do to improve performance and maximize health is to maximize the health of your nervous system. The number one way to do this is allowing a doctor of Chiropractic using the ProAdjuster equipment to analyze and treat your nervous system. The treatment is an alternative to manual adjustments and is ideal for newborns through Seniors! This is the same technology and instrument used by NASA for the Space Program!

*"My newborn daughter had trouble nursing and spit up after nearly every meal. As a new mother I was very concerned about the problems she was having. At five days old we went to see Dr. Petrone, He explained to me that some of her vertebra were out of alignment. She was adjusted using the Pro Adjuster that day. Since that day she nurses with no problem and doesn't spit up nearly as much."*

## It's Time To Start Living Your Life... ...BACK PAIN FREE!

At Community Health & Rehabilitation Center, you will receive the most advanced medical technology in a private clinic setting, and find solutions for resolving your painful health issues in a personalized, caring manner. Our Center utilizes breakthrough non-surgical and non-invasive technology known across the world as Spinal Decompression Therapy. Spinal Decompression was developed by a team of physicians & medical engineers, for the treatment of low back and sciatic pain. We specialize in herniated and bulging lumbar discs with or without complications, degenerative disc disease, relapse or failure following surgery with single or multiple levels of herniation, facet syndromes, and carpal tunnel syndrome.

**Chiropractic care focusing on low back and neck pain relief**

*"I have been in pain for 13 years, since I fell down a flight of stairs. After three surgeries and many types of treatments, I learned to live with my pain. Then I heard about this new machine that treats herniated discs without surgery. Skeptical at first, having nothing to lose, I started treatments on Spinal Decompression. On about the third treatment I began to feel some relief. After completing 15 treatments, I am able to get up in the morning and get dressed with no pain."*
